

General Instructions

Battery and internal modules

Do not attempt to pierce, open, disassemble or short circuit the battery. Do not use the battery if it has been damaged or displays signs of damage, such as swelling. Do not leave the product unattended while charging.

Operating conditions

Do not expose the product to temperatures below 5 °C or above 45 °C.

The product is not waterproof or water resistant. Keep it away from liquids and condensation.

Do not store in direct sunlight.

Recycling

Follow local regulations for disposal of electronic waste and batteries.

Charging

Use the AC adapter and/or cable supplied with the product to supply power from a mains outlet. When using a spare AC adapter and/or cable, ensure it features the same specifications as the original.

Attaching third-party peripherals

Before attaching any peripheral, make sure it is adequately powered and compatible with the device.

Servicing

Some devices may contain user-replaceable components:

- Laptops: battery; memory; storage drives; wireless module(s)
- Phones: battery; smart card; SIM card; storage card; wireless module(s)
- Servers: memory; storage drives

Take proper electrostatic discharge (ESD) precautions. Ensure both you and the device are adequately grounded before servicing the device.

To replace these components, follow the corresponding procedure in our documentation. Disconnect the AC adapter and/or cable before opening the device. Disconnect the battery before accessing any other internal components.

Internal connectors are delicate and susceptible to damage. Use proper tools and procedures to service these components.

Warranty

The products may be covered by a Limited Warranty. For complete and current warranty information, visit: <https://puri.sm/policies/>

Complete documentation
